APPENDIX B OPINION OF PROBABLE COSTS

THIS PAGE INTENTIONALLY LEFT BLANK

## **I. General**

The Town of Lima has received public interest in establishing a water district, along portions of Garden Street, Cleary Road, South Lima Road, Poplar Hill Road, Livonia Center Road, Woodruff Road, Briggs Road, NYS 15A, Clay Street, Doran Road, Jenks Road, Chase Road, Michigan Road, Doran Lane, Cavanaugh Road, Pond Road, Gleason Road, NYS 20, York Street, Bragg Street, Corby Road, Dalton Road, Heath Markham Road, Egan Road, and Gale Road as shown in Figure 1 at the end of this report.

A water district is a special use district required by Town Law where a specific area of the town receives a specific benefit. The cost for receiving this benefit is borne solely by the property owners in that specific area.

The purpose of this project is to provide a safe and reliable potable water supply and fire protection to residences in the proposed Town of Lima Water District No. 5.

## **II. Project Planning Area**

### **A. Location**

The proposed Water District will include a total of approximately 263,590 linear feet of 8-inch water main, hydrant, gate valves, and water services. The water main will be installed along portions Garden Street, Cleary Road, South Lima Road, Poplar Hill Road, Livonia Center Road, Woodruff Road, Briggs Road, NYS 15A, Clay Street, Doran Road, Jenks Road, Chase Road, Michigan Road, Doran Lane, Cavanaugh Road, Pond Road, Gleason Road, NYS 20, York Street, Bragg Street, Corby Road, Dalton Road, Heath Markham Road, Egan Road, and Gale Road of and will serve approximately 657 residential and commercial properties.

### **B. Environmental Resources Present**

There are farmlands present in the project area. All construction will be taking place in existing road right-of-way or easements, and proper construction mitigation and restoration efforts will be implemented based on standard practices common to the industry.

There are Federally and State regulated wetlands, but they will not be impacted by the project as the water main will either be installed in the road right-of-way or directional drilled. In addition, several Class C streams will be crossed as part of the project either under a cross culvert or drilled.

There are no known endangered species in the project area, but the area does have the potential for Northern Long-eared bats. Tree removal, if any, will be limited between April and September.

Historical properties and cultural resources will be further evaluated during design when the precise location of the proposed main can be identified. Construction will not proceed until SHPO is consulted and their approval is obtained.

### C. Growth Areas and Population Trends

According to the United States Census, the Town of Lima had a population of 4,541 in 2000, 4,305 in 2010, and 4,175 in 2020.

### D. Community Engagement

The Town Board has discussed the possibility of extending water to the proposed areas at several public meeting over the past 10-years. In addition, the Town sent out a public survey form to the properties in the proposed district, receiving 242 individual responses.

Approximately 71% of the surveys indicated a desire for public water at an annual cost ranging between \$900 and \$1,500 per year. 56% of the respondents indicated they were not satisfied with the quantity of their private water supply and 54% were concerned with the safety.

There will be additional public meetings should the project move forward to advise the public of construction information and for the District formation.

## III. Existing Facilities

### A. Location Map

The project area in the Town of Lima is not currently served by any water district. Refer to the project location map on Figure No. 1 at the end of this report.

### B. Existing Water Supply

The entire area of the proposed water district is presently served by private wells. The Town of Lima has received several complaints about the quality and quantity of the water in the area. Residents in this area have experienced the following problems:

1. **Insufficient quantity** of water is available for residential wells. Residents must conserve water by alternating shower days, alternating laundry days, or not washing clothes in their residences at all.
2. **Poor water quality** is predominant in the existing well supplies. The water quality requires some residents to either boil water for consumption or purchase bottled water for cooking and consumption.
3. **High cost** to operate and maintain existing well supplies. Several residents must purchase chemicals for softening and treatment systems and must

frequently replace their plumbing systems due to corrosion of their fixtures. Several residents currently pay over \$2,000 per year to operate and maintain their water system, which provides them with poor quality water and insufficient quantities at times.

4. **Fire Protection:** Currently, there is no water system to provide fire protection in the proposed water district. Likewise, there are no significant bodies of water in the vicinity that provide an adequate supply of water for fire protection.

C. Water Demands

The existing demands for the proposed service area are as follows:

**Single Family Homes**

Average Day 117,041 gpd  
(Based on 712 EDU's, each using 60,000 gallons per year)  
Maximum Day 234,082 gpd

**Commercial**

Average Day 4,438 gpd  
(Equates to 27 Single Family EDU's)  
Maximum Day 8,876 gpd

The future demands for the proposed service area will utilize a 1% increase per year. This increase considers population projections and the land use of the area.

## IV. Need for Project

A. Health and Safety

The proposed water main will provide safe potable water to the residents of the Town of Lima Water District and will eliminate the public health risks associated with the quality and quantity of ground water in the area.

B. System O & M

A water distribution network will replace highly expensive individual water treatment units; this will reduce the operation and maintenance costs borne by the residents at this time. The Town of Lima will contract with the LCWSA to provide retail service and operation and maintenance of the proposed service area.

C. Growth

While economic development is viewed as a project benefit, balancing economic development and land protection is necessary, critical, and has been considered for this project.

Agriculture is important to the Town of Lima, functioning as a part of the Town’s economic base as well as being the foundation for the rural character that the Town wishes to maintain.

The Town intends to follow NYS Department of Agriculture & Markets guidelines by passing a lateral restriction policy, which will not permit the Town to provide a lateral to any currently vacant farmland in an Agricultural District. In addition, the proposed district boundary for parcels in certified Agricultural Districts is limited to 75 feet from the centerline of the roadway.

Thus, there are no anticipated long-term impacts to the Agricultural Districts as a result of the proposed action including no change in use of agricultural/residential lands within any Agricultural Districts.

## **V. Alternatives Considered**

### **A. Description**

#### **1. Alternative 1 – Null Alternative**

Estimated Capital Cost: \$ 0

This alternative proposes to “do nothing”. The residents of the proposed Water District No. 5 would continue using their existing well treatment systems, some whose annual costs exceed \$1,500. Costs for the purchase of bottled water and off-site laundry services add an estimated \$500 to \$1,000 per year to the cost of a private well. This could mean escalating health problems and water shortages for the residents of the Town of Lima.

#### **2. Alternative 2 – New Water Distribution System**

Estimated Capital Cost: \$31,140,000

The proposed action includes the installation of approximately 263,590 linear feet of 8-inch water main to provide potable water and fire service. Fire hydrants will be located every 600 feet along the proposed water main. Gate valves will be installed every 1,000 feet and at every branch connection.

It is estimated that 7 PRV vaults will be required to reduce the pressure throughout the system as the water flows from south to north. The exact locations will not be known until detailed design is completed.

Water services (long and short side) will be provided for all properties requiring a service, from the water main to the property line.

The estimated costs for Alternative 2 is detailed in Appendix B.

## B. Design Criteria

The proposed Water District No. 5 has been designed to provide safe potable water and fire protection to the residents within the proposed service area.

## C. Map

The proposed Water District No. 5 map is included in Appendix A. The following guidelines were used to develop the proposed District boundaries:

1. Full parcel for any property with an existing home or business that could connect to the public water system not located in a NYS Certified Agricultural District.
2. 500' offset from the centerline of the roadway for any vacant parcel not located in a NYS Certified Agricultural District.
3. 75' offset from the centerline of the roadway for any vacant parcel located in a NYS Certified Agricultural District.
4. Partial parcel for any property with an existing home or business that could connect to the public water system located in a NYS Certified Agricultural District. The partial parcel will include a box out around the home or business, and will not include the full parcel.

## D. Environmental Impacts

There are no anticipated negative environmental impacts associated with the project. However, an environmental review will be done for the project. All construction will be done in existing road Right-of-Ways or easements, and proper construction mitigation and restoration efforts will be implemented.

## E. Advantages/Disadvantages

Although there are significant costs associated with Alternative 2, it is the most viable alternative as it is consistent with the goals and meets the needs of the Town of Lima. The advantages of Alternative 2 are as follows:

1. It will eliminate the ongoing health risks associated with the quality and quantity of ground water in the area.
2. Combined with other proposed water districts, it will be a step towards creating redundancy in the existing system increasing the reliability of potable water supply and fire flow.

## VI. Recommended Alternative

The recommended alternative is Alternative 2 - New Distribution System for the proposed Water District No. 5.

### A. Project Design

#### 1. Water Supply

The Town of Lima water main will receive water from the LCWSA.

#### 2. Treatment

The LCWSA obtains water from the City of Rochester Water Treatment Plant located on Hemlock Lake. The treated water meets all the state and federal drinking water standards.

#### 3. Storage

Water storage in the Town will be provided by a proposed LCWSA 3.0 million gallon (MG) within the Town of Livonia.

#### 4. Pumping Stations

A proposed LCWSA pumping station located along Pond Road will supply water to the Town.

#### 5. Distribution Layout

The entire district is shown in Figure 1 at the end of this report. The LCWSA will be responsible for system operation and maintenance. The distribution system will be sized for the needs of the service area.

#### 6. Water Services

The portion of the water service from the right-of-way to the main line will be the responsibility of the District. The portion from the right-of-way to the home will be the responsibility of the homeowner.

### B. Proposed Water District Costs

The residents of the proposed District will assume the cost for the project. The estimated project unit costs are based on financing through USDA Rural Development at a 2.75% interest rate for a 38-year term.

The estimated average annual water cost was estimated based on a retail rate of \$4.50/1,000 gallons from the LCWSA and an average usage of 60,000 gallons/unit/year, along with a base charge \$37 per quarter.

1. The estimated costs for the proposed project are detailed in Appendix B and summarized as follows:

Total Estimated Capital Cost	\$31,140,000
Estimated Grant	(\$20,200,000)
Net Project Costs	\$10,940,000
Annual Debt Service (38 years, 2.75%)	\$467,660
Estimated Debt Service/Unit (824.7 units)	\$567.07
Estimated Yearly Water Cost	\$410.00
<b>Total Estimated Unit Cost (Rounded)</b>	<b>\$978</b>

2. Equivalent Dwelling Units

Unit definition

- Any facility will be considered as a minimum of one (1) unit.
- Each single-family residential dwelling shall be considered to be one (1) unit. Included in this category will be single family houses and mobile homes.
- Multiple single-family dwellings on the same parcel of land will each be considered an individual unit.
- Vacant developable land not within the certified agricultural district will be assessed one-half (0.5) of a unit.
- Vacant undevelopable land not within the certified agricultural district will be assessed one-tenth (0.1) of a unit.
- Non-residential, commercial, and industrial facilities will be assigned an equivalent number of units based on usage.

3. Other One Time Costs

LCWSA Fee including Meter	\$650
Service Line	\$20/LF (\$1,000 Average)
Well Separation/ Plumbing Modifications	\$500

## VII. Miscellaneous Information

- A. Options for property owner's well

1. Abandon the well.
2. Keep well but separate it from public water plumbing.
3. Keep well and install backflow prevention.

B. Service Line Information

1. A service line will be installed to all residences, from the water main to the road Right-of-Way, for connection to the public water system.

C. Optional Water District Enhancements with Remaining Funds

1. Upsize water main diameters to allow for future growth of the water system and maintain above average fire flows.
2. Extend water mains to the District Boundaries and through road intersections.
3. Reimburse the costs of the any fees for the residents of the Water District.

D. Short Lived Assets

The water main, fire hydrants, valves, and water services should have a useful life of approximately 50 years with routine maintenance. Hydrants and valves may require replacement earlier if they are struck by a snowplow or damaged in an automobile accident.

E. Project Schedule

The project is anticipated to take place in several phases, with an overall schedule as follows:

Design & Permitting	9 Months
Bidding & Award	3 Months
Construction	36 Months

## VIII. Conclusions

The Town of Lima is committed to providing safe and reliable potable water supply and fire protection to its residents. This specific project will be instrumental in achieving that goal. It is recommended that the Town of Lima seek funding for completion of the project.
